Danny Esteban Muñoz Velasquez

Junior Software Engineer | Cloud, Web & Digital Solutions

Results-driven Junior Software Engineer combining hands-on full-stack development skills with a background in International Business and banking operational exposure. Certified in **Microsoft Azure Cloud Services** and **IBM Full-Stack Development**. Proven ability to implement performant web applications, consume remote RESTful APIs, apply Early Quality practices (unit testing, debugging, Clean Code), and enforce OWASP security fundamentals. Experienced in agile environments, cross-functional collaboration, and aligning digital solutions with core enterprise and banking objectives. Available for hybrid work in Quito (3+ days/week).

RELEVANT EXPERIENCE

Junior Software Developer — Present
ETRIEN S.A.S. | Quito, Ecuador
Development and optimization of B2B corporate web platforms, modular responsive UI components, RESTful API integrations, and scalable software solutions.

Operations & Systems Coordinator — 06/2024 - Present
MilamorTruck S.A | Quito, Ecuador
Manage digital billing systems, logistical workflows, and administrative operations. Optimize internal data handling, invoice control, and operational procedures with high accuracy and compliance.

Collections & Contract Operations Specialist — 2023 - 12/2024
Netlife / Megadatos S.A | Telecommunications
Managed digital contract records, CRM database integrity, user account verification, and query resolution in a fast-paced environment, maintaining strict data accuracy and client service SLAs.

Corporate Operations & Records Intern — 06/2019 - 09/2019
Banco del Pacífico | Banking Sector
Gained direct exposure to banking chapter workflows, institutional policies, internal auditing guidelines, and digital records administration adhering to strict regulatory standards.

FEATURED TECHNICAL PROJECTS

Arlene's Cleaning Co. 🔗 Live Demo | React, Responsive UI, State Management
Engineered a responsive commercial web application featuring an interactive 60-second instant estimate calculator, accessible component architecture, and bilingual data handling.

David's Moving Services & Logistics 🔗 Live Demo | React, Tailwind, Micro-interactions
Developed a full commercial web platform with real-time moving cost estimator, dynamic truck selector, and responsive UI optimized for high conversion and mobile accessibility.

TicketNow - Event Ticketing Platform 🔗 Live Demo | Full-Stack, Astro, JavaScript
Built a high-performance ticketing application featuring complete shopping cart state logic, checkout validation, clean modular architecture, and modern dark-first design.

Dealership Reviews Cloud Application | Python, Django, IBM Cloud, Kubernetes
IBM Capstone: Built a full-stack microservices application for dealership reviews using Django backend, containerized with Docker, and deployed on Red Hat OpenShift / Kubernetes.

Book Review RESTful Web Service | Node.js, Express, JWT, Async/Await
Designed and implemented a REST API with complete CRUD capabilities, JWT session authentication for secured endpoints, and asynchronous error handling for concurrent requests.
