CERTIFICATIONS

Azure Cloud Services
Microsoft Certified - Year 2025

Full Stack Cloud Developer
IBM Professional Certificate - Year 2025

Google Cloud Fundamentals
Google Cloud Core Infrastructure - Year 2025

Django Application Development
SQL and Databases IBM - Year 2025

English C1 Certification
EF Education First - Advanced C1 Level

TECHNICAL STACK

Frontend:	React, JavaScript, TypeScript
Styles:	HTML5, CSS3, SASS, Tailwind
Cloud and DevOps:	Azure, Docker, GitHub Actions, Git
Backend and APIs:	Node.js, Express, Python, Django
Databases:	PostgreSQL, SQLite, Cloudant
AI Tools:	Copilot, Claude, GPT, Gemini

EDUCATION

Tecnología Universitaria en Desarrollo de Software
Pontificia Universidad Católica del Ecuador - 2025 to Present

B.S. in International Business
Universidad De Las Américas - UDLA - Graduated

LANGUAGES

Spanish:	Native
English:	Fluent - C1 Certified

AVAILABILITY

Status: Immediate Availability
Work Mode: Full Time or Hybrid
Timezone: UTC-5 aligned with US Eastern Time

RELEVANT EXPERIENCE

Junior Software Developer Freelance — Present
ETRIEN S.A.S. - Freelance - Quito, Ecuador
Reduced initial page load time by 40 percent and achieved a 95 plus Lighthouse performance score by building responsive B2B web modules in React and TypeScript with lazy loading architecture. Improved backend query responses by 35 percent by integrating secure RESTful APIs with JWT authentication and PostgreSQL relational data modeling. Decreased production deployment issues by 30 percent using automated GitHub Actions CI CD pipelines and unit tests in Vitest.

Logistics, Operations and Fleet Maintenance Lead — June 2024 to Present
MilamorTruck S.A - Full Time - Quito, Ecuador
Head of operational logistics and general business administration. Maintained heavy transport fleet availability at 98 percent by scheduling preventive mechanical servicing and tractor truck repairs with specialized partner shops to eliminate unscheduled downtimes. Accelerated electronic billing and financial reconciliation by 60 percent by automating inventory tracking and route sheets using Python scripts and internal digital systems.

Call Center Collections, Billing and Retention Specialist — April 2023 to December 2024
Netlife - Megadatos S.A - Full Time - Telecommunications
Elevated customer retention rate to 92 percent by managing direct call center inbound outbound communications, resolving customer disputes, and structuring tailored payment agreements. Maintained 99 percent recurring billing accuracy by auditing over 5000 service contracts in the CRM database and managing overdue accounts with top tier customer service standards.

FEATURED TECHNICAL PROJECTS

Arlene's Cleaning Co. Live Demo
React 18, TypeScript, Tailwind CSS, Vercel CI CD, Web Accessibility
Increased prospective client conversion rate by 35 percent by creating an instant pricing calculator in React and TypeScript that computes accurate rates by square footage and service frequency in under 200 milliseconds with full web accessibility.

David's Moving Services & Logistics Live Demo
JavaScript ES6+, State Management, Tailwind CSS, Vercel Deployment
Decreased booking abandonment by 40 percent by engineering an interactive moving volume estimator in cubic meters and cubic feet with reactive state handling and real time form validation.

TicketNow - Event Ticketing Platform Live Demo
Astro, Modular JavaScript, LocalStorage State, Responsive UI
Achieved a Time to Interactive of less than 0.8 seconds by building an event ticketing store in Astro featuring local storage cart state persistence and fast category filtering without page reloads.

Dealership Reviews - Distributed Microservices Platform | Python, Django, Docker
Secured 99.9 percent service availability by containerizing a distributed architecture with Docker where a Django vehicle catalog service interacts with an asynchronous user reviews engine built with Node.js and Cloudant NoSQL.

RESTful Book and Course API - Secure Authentication Service | Node.js, Express, JWT
Protected sensitive catalog data transactions achieving 100 percent critical endpoint coverage through role based JWT authentication with Bcrypt password hashing and clean MVC architecture validated with integration test suites in Postman.
